

Project Webpage (D3.1)

Research infrastructures cooperation for energy transition between European and Latin American and the Caribbean countries.

Document Control Information

Settings	Value
Document Title:	Project webpage
Project Title:	EULAC Energytran: Research infrastructures cooperation for energy transition between Europe and Latin-American and the Caribbean countries
Project Coordinator:	OEI
Deliverable leader:	OEI
Number and type of deliverable:	D3.1 – DEC - Websites, patent filings, videos, etc.
Work Package number:	WP3
Doc. Version:	Final version
Description:	Project webpage with all dissemination deliverables
Dissemination level:	Public
Date:	25/06/2024

Deliverable (webpage) Approver(s) and Reviewer(s)

All Approvers are required. Records of each approver must be maintained. All Reviewers in the list are considered required unless explicitly listed as Optional.

Name	Role	Action	Date
OEI	Coordinator	Elaboration	01/06/2024
General Assembly of the project	Decision-making body of the consortium	Review	21/06/2024
Steering Committee	Executive body of the consortium	Approve	25/06/2024

Deliverable (webpage) history

The Deliverable Author is authorized to make the following types of changes on the deliverable without requiring re-approving:

- Editorial, formatting, and spelling
- Clarification

To request a change, contact the Document Author or Owner.

Changes on the deliverable (webpage) are summarized in the following table in reverse chronological order (latest version first).

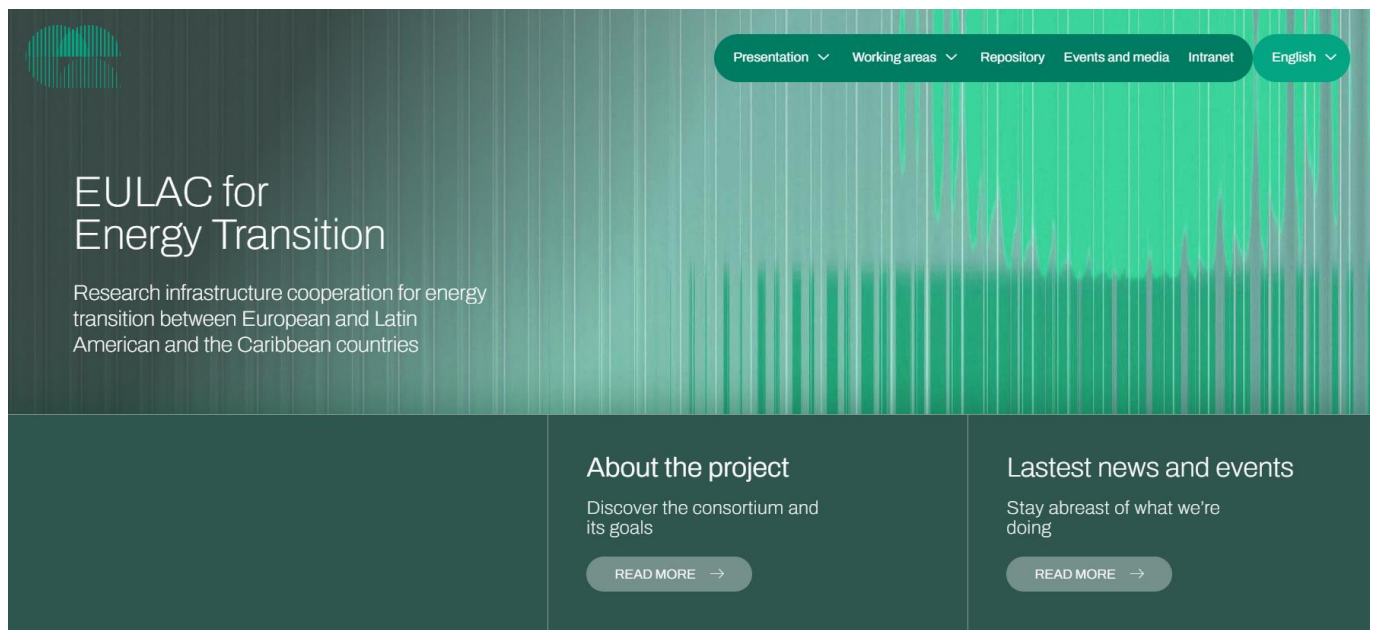

Revision	Date	Created by	Short Description of Changes
Version 1	25/06/2024	OEI	Final version included on the EU Portal and https://energytran.oei.int

Executive Summary

Within the framework of the ENERGYTRAN project, for the Work package 3, led by the OEI, the Deliverable D3.1 – Project webpage has been prepared. The objective of this web is to disseminate all the results and deliverables of the project. This webpage will be periodically updated with the results, events and other relevant activities. In addition, ENERGYTRAN webpage includes an intranet (an internal part only available for partners) to share the documents on a collaborative way among the Consortium.

Project's website: <https://energytran.oei.int>

General information included on the webpage

ENERGYTRAN website guarantees that general content of the project, as well as the results and the daily life of the project is communicated openly. Besides, it also provides the possibility of assuring the dissemination of the results of the first 24 months, as well as after the end of that period, for the following four years. This platform will be hyperlinked on the websites of each partner and shared in social media.

Public part of the website is composed by two parts:

- **General information of the project:** distributed in the home page, the presentation and the working areas. This information is static and intends to inform users about the general information of the project, which means the general scheme of what the project is about and its working plan.

- **Dynamic information:** distributed in the repository and in events and media page. This part contains updated information about the deliverables committed in the project – public ones are available for downloading –, as well as audiovisual material, and the events in agenda and the latest news. These four kinds of information will be uploaded and updated by the partner in charge of the activity/deliverable/workpackage that motivates the information. In relation to news, partners can upload to the Energytran web photographs, headlines, subtitles, opening paragraphs and the link to the complete piece of news already available in their institutional websites.

Partners and collaborative entities

All the information uploaded in project's website is available in English, Spanish and Portuguese. In addition, the Consortium guarantees the fulfillment of the requirements of the GDPR.

Process followed to create ENERGYTRAN webpage

OEI has followed a participatory methodology to elaborate the project webpage. All partners and OEI specialized areas (legal, communication, etc.) have been involved in the process. Main steps done have been as follows:

Energytran

www.energytran.oei.int

energytran@oei.int

**Funded by
the European Union**

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union. Neither the European Union nor the granting authority can be held responsible for them.
